

## SUMMARY

Data engineer & sustainable energy enthusiast committed to crafting tailored innovative solutions to business and social challenges, leveraging five years' IT experience and strong analytical skills. Have headed projects for the biggest online hotel booking platform and fastest growing startup in Nigeria, hotels.ng. Having led a team of software engineers for two years, I've driven the execution of projects for top organizations in Nigeria including the most-read newspaper in the country. My long-term career goal is to work towards being qualified as a chief artificial intelligence officer for a global organization.
